### **EXECUTIVE SUMMARY**

This report provides an overview of the research activity conducted by surgeons within the Division of Surgery and Anaesthesia (DoSA) at Royal North Shore Hospital (RNSH) between 2018 and 2020.

For all surgeons, improving the surgical care they provide and achieving the best outcomes for patients is a high priority. Surgical research at RNSH includes investigations and assessments of new surgical approaches and techniques, collaborative translational research, and improving current practices through data analysis and clinical audit.

Initially, the SERT Institute collated the publications listed in this document after undertaking a systematic search of peer-reviewed publications authored by RNSH surgeons. The lists for each department were then distributed to the relevant Heads and Academic Leads for review to confirm accuracy and completeness. Each department was asked to provide further information about the range of other research activity undertaken by the surgeons including involvement with laboratory-based activities and or supervision of higher degree research.

This report highlights the large volume of research activity and peer-reviewed publications across the RNSH Division of Surgery and Anaesthesia from 2018-2020. Almost 350 published manuscripts were generated during this period equating to an average of 138 publications annually for DoSA. Several departments have a particularly strong focus on translational research with links to laboratories either in the Kolling Building or external to RNSH. The Surgical Research Activity Report 2018-2020 is a dynamic document that will be updated regularly as new research activity and publications occur.

Ten Hyp.

**Professor Thomas Hugh** Director, Surgical Education Research & Training Institute

In conjunction with NSLHD and on behalf of DOSA, the SERT Institute has collated all research conducted across surgical departments at Royal North Shore Hospital from January 2018 to June 2020. This was a major project of work to highlight the depth and breadth of research that is occurring across all departments. It is extremely impressive that our busy clinical departments consistently undertake a high volume of research and contribute to achievements within their speciality.

I would like to thank the staff of the SERT Institute for their hard work in producing this inaugural report. For information about the SERT Institute and opportunities to engage in research, education and training within surgery at RNSH please visit the SERT Website <u>https://surgery.rnsh.org/</u>
